AWS Project: Containerized Node.js Application

Output:

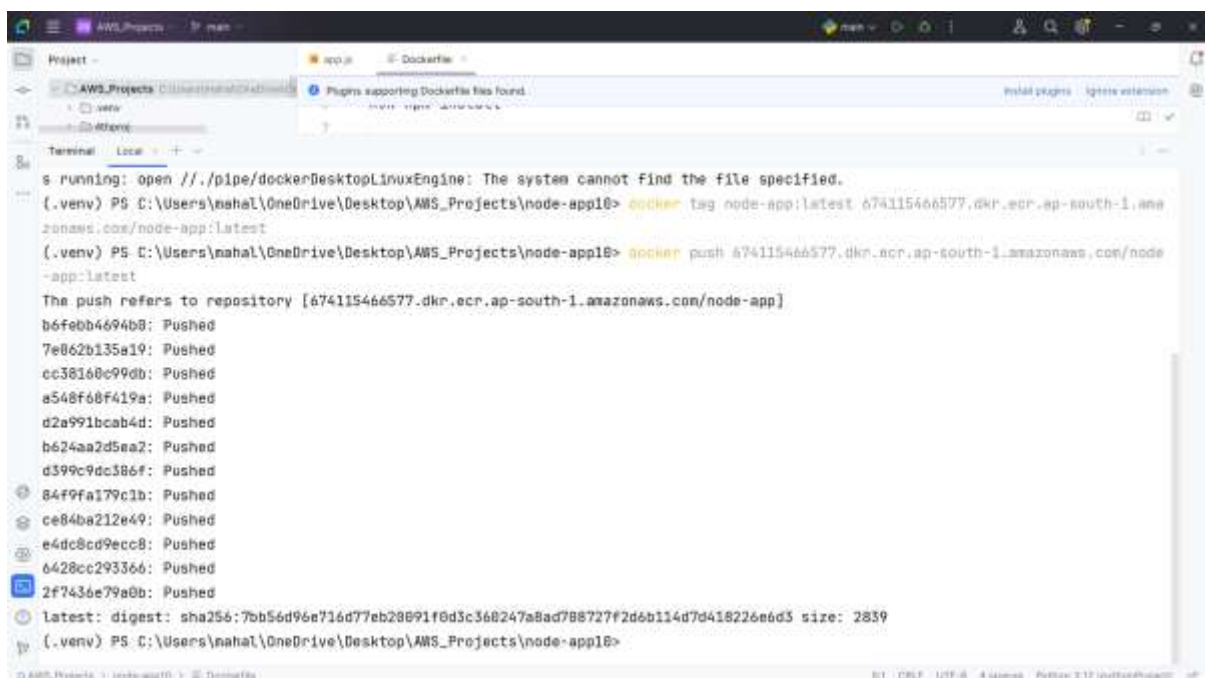

The screenshot shows the PyCharm IDE with a project named 'AWS_Projects'. The file explorer on the left shows the project structure, including a 'node-app10' directory with files like 'app.js', 'Dockerfile', 'package.json', and 'package-lock.json'. The main editor displays the 'app.js' file with the following code:

```
1 const express = require('express');
2 const app = express();
3
4 app.get('/', (req, res) => {
5     res.send('Hello from Docker + ECS 🚀');
6 });
7
8 app.listen(3000, () => {
9     console.log('Server running on port 3000');
10 });
```

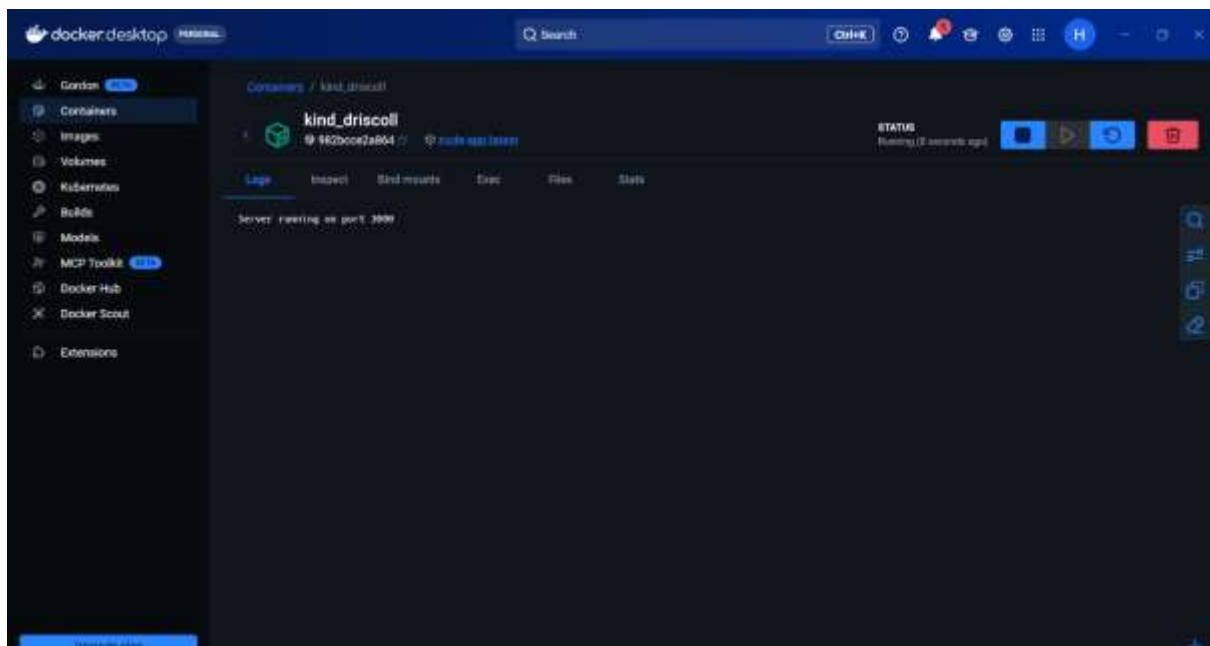

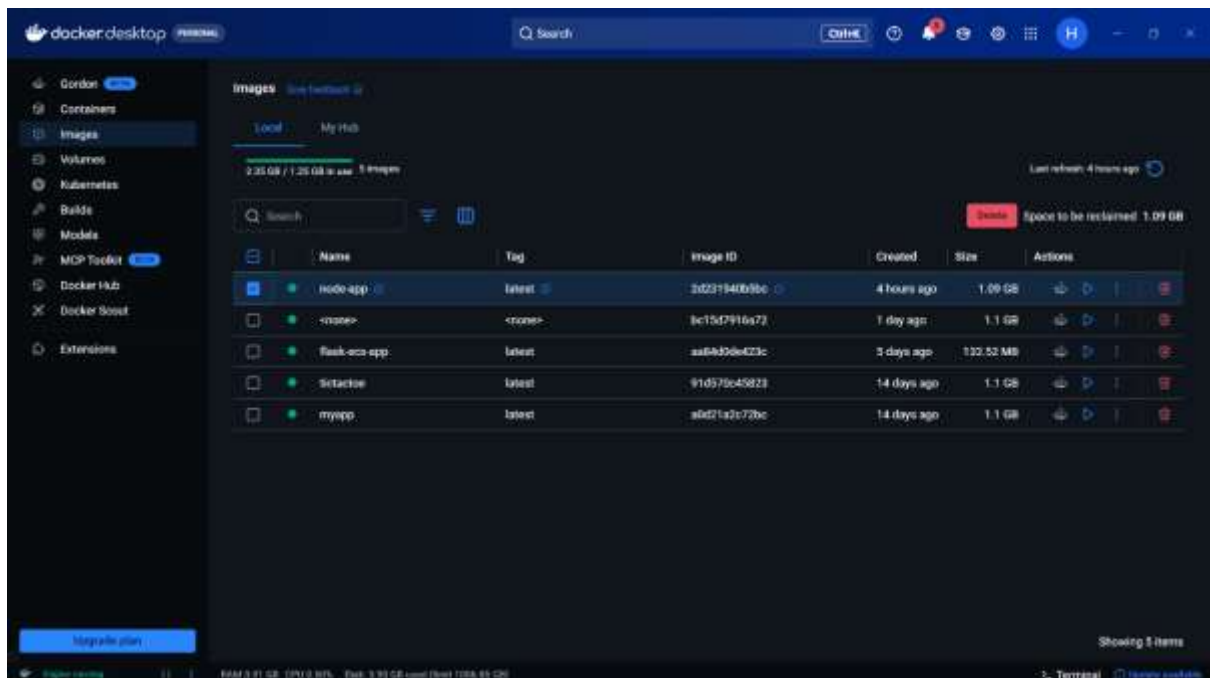

The terminal at the bottom shows the command prompt output:
