

Name: Harsh Ramakant Neve

AWS Project: Multi-tier Web App Deployment

Output:

The image displays two screenshots from an AWS Cloud environment. The top screenshot is a terminal window in AWS CloudShell showing the installation and configuration of Nginx on an Amazon EC2 instance. The terminal output includes commands like `sudo systemctl start nginx`, `sudo systemctl enable nginx`, and `sudo systemctl status nginx`. It also shows the Nginx service status as 'active (running)' and provides details about the service's configuration and resources. The bottom screenshot is a web browser window showing the 'Welcome to nginx!' page, which is the default page served by the Nginx web server. The page includes instructions on how to configure Nginx and links to the official Nginx website.

```
NO Services need to be restarted.
NO containers need to be restarted.
No user sessions are running outdated binaries.
No VM guests are running outdated hypervisor (qemu) binaries on this host.
ubuntu@ip-10-0-1-31:~$ sudo systemctl start nginx
ubuntu@ip-10-0-1-31:~$ sudo systemctl enable nginx
Synchronizing state of nginx.service with SysV service script with /usr/lib/systemd/systemd-sysv-install.
Executing: /usr/lib/systemd/systemd-sysv-install enable nginx
ubuntu@ip-10-0-1-31:~$ sudo systemctl status nginx
* nginx.service - A high performance web server and a reverse proxy server
   Loaded: loaded (/usr/lib/systemd/system/nginx.service; enabled; preset: enabled)

Welcome to nginx!

If you see this page, the nginx web server is successfully installed and working. Further configuration is required.

For online documentation and support please refer to nginx.org.
Commercial support is available at nginx.com.

Thank you for using nginx.
